Internship logbook

Gedu College of Business Studies

Gedu, Chhukha.

Individual Assignment Submitted by:

Jamyang Chozom (03230075)

III-Year, II-Semester, Bachelor of Business Intelligence, Financial Engineering ("A")

01/03/2026

DECLARATION

Module Code:	PIP301	Type of Course Work:	Individual Task
Module Title:	Professional internship	Module Tutor:	Dr. Tshewang Phuntsho
Date of Submission:	1st March, 2026		

I hereby declare that this academic work is my own and those referred ideas from other sources have been appropriately acknowledged. The material in this submission has not been previously submitted for assessments. I understand that if found otherwise, my academic work will be cancelled, and no marks will be awarded, besides legal consequences.

Jamyang Chozom (03230075)

Internship Logbook

Student Name	Jamyang Chozom	Internship Host Organization:	Bhutan Data Scientist
Host Supervisor/ Appointed Mentor's Name	Mr. Troy Sadkowsky (CE0)	Week	09-10
Internship Coordinator / Academic Supervisor		Mr. Tshewang Phunstho	

Week: 09 **Working Time: 9 am to 5 pm**	**Date: 16/2/2026 to 20/02/2026**
Description of Activity	• **Work Outcome (**What was done and completed, and what was learned from the task assigned during the day?)
Monday: 16/02/2026 ✓ focused on dashboard creation in tableau ✓ used pivot features to graph for multiple response ✓ asked for feedback and revisited tableau graph to refine the charts and graphs. **Tuesday:17/02/2026** ✓ turned my project plan to commercial lens ✓ planned to build simple website referencing my project report and findings	**Monday: 16/02/2026** **Things I did and learnt:** ✓ Completed visualizing the graph ✓ I learnt how to use pivot feature, how to clean data, fill missing cells ✓ How to do analysis from the graphs **Tuesday:17/02/2026** **Things I did and learnt** ✓ Planned to build simple website ✓ Learnt how to bring mu project plans into commercial space

✓ continued working on visualizing graph for different columns **Friday:20/02/2026** ✓ I continued working on visualization and analyzing the stress factors, the outcomes and stress frequency. ✓ Dashboard my graphs for better storytelling about interns' stress	**Friday:20/02/2026** **Things I did and learnt** ✓ Learnt about interns' stress frequency, the outcomes of stress and the stressors ✓ I refined my dashboard for better storytelling
Signature of the Intern	**Signature of Host Supervisor/Appointed Mentor**

Date 18 and 19 were holiday for chunipa Losar

Week: 10		**Date: From Feb 24 to Feb 27**
Working Time:	**9 am to 5pm**	
Description of Activity		**Work Outcome (**What was done and completed, and what was learned from the task assigned during the day?)

Tuesday: 24/02/2026 ✓ continued improving visualization based on feedback. ✓ Used annotation for meta data **Wednesday:25/02/2026** ✓ Continued working on	**Tuesday 24/02/2026** **Things I did and learnt** ✓ Reviewed and improved visualizations ✓ Refined chart improved dashboard. ✓ Learnt the benefits of doing multiple rechecking pf visualization ✓ Improve the analysis with using simple words
Signature of the Intern	**Signature of Host Supervisor/Appointed Mentor**

Monday was national holiday for HM's birth anniversary

1. **What new knowledge or skill did you learn during the internship this week?**

These weeks, I mainly worked on tableau and dashboard. I learned how to create different types of charts and organize them into a clear and interactive dashboard.

My skills in using filters, parameters, calculated fields, and formatting to make the dashboard also improved. I also learned how to connect data properly and fix errors when the data source had issues.

2. What have you learned in college that you applied during the internship?

During my project, my knowledge helped me understand which type of chart is suitable for different kinds of data.

I also used concepts like data cleaning, organizing variables, and interpreting results. Critical thinking skills helped me decide how to structure the dashboard so it clearly shows key insights.

3. List any difficulties, mistakes, pleasant or unpleasant experiences that occurred this week. What did you do to correct your mistake(s)?

One difficulty I faced was dealing with errors in Tableau, such as connection issues and problems with calculated fields. The charts were not displaying correctly because of wrong field selections or data type issues.

I had to check the data source, review each field, and tested calculations step by step.

A pleasant experience was seeing the dashboard after multiple tries of fixing the errors.

4. On what skill or question could you use help to perform your internship responsibilities better?

I would like more guidance on advanced tableau features, especially creating more interactive dashboards.

I also want to improve my skills in designing dashboards that are not only visually appealing but also clearly communicate insights to users.

5. What interesting or challenging experience did you have with your fellow workers or Host Supervisor/Appointed Mentor?

One challenging experience was explaining my dashboard design and the insights I found. I had to clearly justify why I used certain charts and layouts.

My Host Supervisor gave feedback on improving clarity and simplifying the dashboard. This helped me understand that a good dashboard should be simple, clear, and easy to read.
